

WANT TO VISIT A WIND FARM?

Visiting a wind farm can be useful in helping people learn more about wind energy and understanding what the project proposed for their area might look like.

We always offer people the opportunity to visit an operating wind farm so they are able to have firsthand experience, this helps dispel common myths and misconceptions about wind turbines.

RES is offering a trip to a local wind farm on Wednesday 7th April

Transportation and refreshments will be provided by RES.
If you would be interested in joining us please contact:
